

I beleive Satelllite radio is the future for radio. Because I choose to pay for this service, its content should not be regulated or influenced by the National Association of Broadcasters (NAB). If the NAB members are affected in a negative way by satelitte radio, the members should understand that is called competition, and if they want to remain a viable business, they will have to adapt to the technology changes.

I urge the REJECTION of NAB's petition 04-160 by the FCC.
